【1】タクヤと神戸に住んでいる交換留学生のサラが、オーストラリアのクリスマスについて話している。次の会話を読んで、後の問いに答えよ。

Sara : Did you enjoy your winter vacation, Takuya?

Takuya : Yes, I did. I went to Australia during my vacation. I visited my older brother, Hideaki.  
He goes to college in Brisbane.

Sara : Wow! Sounds exciting.

Takuya : He often told me that Christmas there is very interesting, so I wanted to see it.

Sara : How was it?

Takuya : It was really good. Hideaki took me to a Christmas party. He told me to bring a Christmas present. At the party, I gave it to one of his friends. And he gave me a present.  
After that, I talked with Hideaki's friends.

Sara : What did you talk with them about?

Takuya : I talked about my family and my school life. It was difficult for me to speak English, but

Sara : I'm happy to hear that. I think your English is good.

Takuya : They usually begin to write Christmas cards in early December and send them to their family and friends.

Sara : Wow! We exchange cards, too.

Takuya : People in Australia enjoy eating Christmas dinner with their family.  
I think their Christmas is like our New Year's Day.

Sara : I think so, too!

【3】Mr. Tom Smith, an ALT who works in Kobe, stated his opinion about “Rethinking Recycling”. Read the following essay and answer the questions below.

One big source of pollution is the waste produced by modern lifestyles. For this reason, many people have been making efforts to recycle their waste. Supporters of recycling argue that it is good for the environment in many ways. For one thing, it ( A ) pollution caused by burning or burying garbage. Recycling also saves resources because the materials in the waste are reused.

However, some environmentalists have begun to criticize recycling. They say that the kind of recycling we do today is often the wrong way of dealing with waste. They explain this by pointing to the history of bottled drinks in the United States. In the past, almost all drink bottles were collected and reused by drink companies. These bottles were made of glass, and when people bought drinks, they paid a little extra for the bottle. When they took this bottle back to the store, they got their money back. The companies would then collect the bottles and ship them back to the factory to wash and reuse them.

In the 1970s, this changed. Companies found it cheaper to sell drinks in plastic bottles that could be thrown away, but this created more and more garbage. The companies became worried that they would be asked to ( B ) the more expensive old system of reusing bottles. As a result, they began to support the idea of individuals recycling plastic. This idea made consumers, rather than companies, responsible for the waste. However, environmentalists do not think this is a good thing. They point out that when a company has to pay for the waste it produces, the company tries to reduce such waste. They argue that we should make all companies responsible for the waste from their products. In this way, companies would be encouraged to produce less waste.

(1) Choose the appropriate word for (A) and (B) from the words ①～④.

(A) ① demonstrates ② measures ③ decreases ④ transports

(B) ① add onto ② fix up ③ take out ④ return to

( A )	( B )
7	8

(2) Choose the answer that does not fit Tom’s essay.

- ① Some environmentalists have criticized the recycling we do today.  
 ② People in the US used to pay a little extra for bottles.  
 ③ Companies replaced glass bottles and started using plastic bottles.  
 ④ Recently all companies have started to reduce waste.
